Educaplay

 **BASICS**

Web-based platform for creating educational games such as crosswords, word searches, and riddles, adaptable to escape room enigmas.

**URL / Access:** <https://www.educaplay.com>

**Primary puzzle types:**

- Logic
- Cipher (word-based, substitution via clues)
- Math (basic calculations, sequencing)
- Drag & Drop (matching, ordering)
- Other: Crosswords, word search, quizzes, riddle-based locks

 **SUPPORT & ALTERNATIVES****Docs/tutorials:**

- Built-in help guides and FAQs on the Educaplay website
- Short [tutorial videos](#) explaining each activity type

**Community/forum:**

- Educaplay user community with shared public activities
- Teacher-created examples that can be reused or adapted

## HOW TO USE IT

1

### STEP 1: Create a free account

Go to Educaplay.com and sign up using an email address or an existing Google/Microsoft account to access the activity editor.

2

### STEP 2: Choose an activity type

From the dashboard, click “Create activity” and select a game type (e.g. crossword, riddle, matching, quiz). Choose the type that best matches your escape room puzzle idea.

3

### STEP 3: Design the puzzle content

Fill in the prompts, clues, questions, answers, or word lists. For escape rooms, design puzzles so that the final answer forms a code, keyword, or number combination.

4

### STEP 4: Configure settings and feedback

Adjust options such as hints, attempts, timers, or scoring. You can allow retries or give feedback messages that act as “success” or “try again” screens.

5

### STEP 5: Save and test the activity

Preview the activity to ensure clues work logically and answers unlock correctly. Test it as a player to check clarity and difficulty.

6

### STEP 6: Combine multiple activities into an escape room flow

Use several Educaplay activities in sequence by sharing links or embedding them into another platform (e.g. Genially, Google Sites, LMS). Each solved puzzle can provide a clue for the next one.

7

### STEP 7: Share with players

Share the activity link, embed code, or assign it through a virtual classroom so players can access it easily.

## ADDITIONAL INFORMATION

**Multilingual support:** Available in multiple languages including English, Spanish, French, Portuguese, Italian, German, and others (interface and content depend on creator input).

**Technical requirements:** Works on computers, tablets, and smartphones. Internet connection required. Runs in a web browser (no installation needed).

**Does it work offline?** No

**Adaptations for SLD users:** Educaplay supports learners with specific learning difficulties by offering short, focused activities with clear instructions, immediate feedback, and reduced visual complexity compared to full-screen narrative games.

### Cost and access:

- **Price:** Freemium
- **Free plan limits:**
  - Public activities
  - Limited customization
  - Advertisements displayed
- **Account required?** Yes (for creation); No (for playing shared activities)
