HOW TO USE IT

For creating Cipher Puzzle

1

STEP 1:

Go to the **“Caesar Encoder”** and write your solution in the text box.

2

STEP 2:

Put down the number of shift/keys and select which alphabet to use. Encryption with Caesar code is based on an alphabet shift. The most commonly used shift/offset is by 3 letters such that A becomes D.

3

STEP 3:

Click on the **“Encrypt”** button.

4

STEP 4:

You will find you encrypted message in the box overhead **“Caesar Cipher Decoder”**, you can now use it in your escape game.

ADDITIONAL INFORMATION

Multilingual support: English, French, Spanish

Technical requirements: Website accessible on PC, Smartphone and tablets. An internet connection is required.

Does it work offline? No

Adaptations for SLD users: Cipher codes can be difficult for SLD users because they require remembering symbols and multi-step decoding. To make it SLD-friendly, it's important to have **clear visuals and/or guided supports**. Creating cipher codes for SLD users would be better **if the code is short** and, if possible, colour-coded.

Cost and access:

- **Price:** Free
- **Free plan limits:** No
- **Account required?** No
