BASICS

The Morse Code World translator is a simple online tool that lets you turn any text into Morse code — or Morse code back into normal text — in just a few clicks. You can even play the sound, flash a light, or share the message with others.

HOW TO USE IT

1

STEP 1:

Write your text in the box on the left, or paste Morse code in the box on the right.

2

STEP 2:

Select the speed, sound, light, or other settings if you want to customise the translation.

3

STEP 3:

The tool instantly converts your text to Morse code (or Morse to text) as you type.

4

STEP 4:

Use the buttons to **play the sound, flash the light, or copy/share** the Morse code.

5

STEP 5:

You can save the audio or the flashing-light video using the download buttons.

ADDITIONAL INFORMATION

Multilingual support: The interface is English only; this is why it is best suited for most languages using the Latin alphabet.

Technical requirements: Website accessible on PC, Smartphone and tablets. An internet connection is required.

Does it work offline? No

Adaptations for SLD users: Morse code can be hard for SLD users when it's only audio, but adding a clear visual version makes it much easier to understand (for example, using a screenshot of the visual output of the Morse code).
