ADDITIONAL INFORMATION

Multilingual support: English and Spanish interface, but the tool can work with any language using Latin characters.

Technical requirements: Any device with a web browser and an internet connection.

Adaptations for SLD users: Short messages and strong visual contrast can support engagement, but facilitators should ensure readability for learners with dyslexia.

Cost and access:

- **Price:** Free
- **Free plan limits:** No
- **Account required?** No

HOW TO USE IT

1

STEP 1: Write your message

Type the message you want to display (e.g. a threat, clue, warning, or mysterious instruction related to the escape game scenario).

2

STEP 2: Generate the ransom note

The tool automatically creates a ransom-note-style image using mixed fonts and letter cut-outs. You can also customise your ransom note (colours, font, text size, rotation, misalignment, textures, etc.)

3

STEP 3: Save or screenshot the visual

Download or capture the generated image to use it digitally or print it.

4

STEP 4: Integrate into the escape game

Use the ransom note as a narrative clue, a mission briefing, an antagonist's message, or a puzzle element.
